

Global Climate Change

Week 8

18/8/2017

Summary

1. **Continue writing the report named UNITED NATIONS 2.0: LOW-CARBON ECONOMY-THE FINAL DESTINY FOR HUMANS (60%)**
2. **Complete the first draft of our medal description poster**
3. **Making video**

Plan for Next Week

ABSTRACT

Background-why do we want to do the research – 500

- ☐ What global challenges are we facing today? (How many of the challenges come from unsustainable economy)
- ☐ **Sustainable economy will be the ultimate solution.**
- ☐ It's very urgent to take sustainable economy.
- ☐ (Earth overshoot day theory, how much time we have, how much carbon each person can produce) 200
- ☐ What actions have people done currently, effective or ineffective?
- ☐ What's the problem of current governance model?
- ☐ Where do we need to reform the current governance model?

Research question 300

- ☐ How can sustainable economy resolve the global challenges?
- ☐ What kind of global governance model do we need?
- ☐ Where can we start from?

MODEL DESCRIPTION-5500

Brief Introduction

Key points of the Governance Model

- ☐ Economy-based governance
- ☐ Outcome-based performance assessment
- ☐ Project-based governance
- ☐ Credit-based governance (400)

UN 2.0 Department Integration

- ☐ Decision making council
- ☐ Executive office
- ☐ Technology and development center
- ☐ Supporting Department
- ☐ Supervision Department

Carbon-footprint Point Consumption System

- ☐ Related Definition
- ☐ Mission Statement
- ☐ Why do we need a 'carbon-neutral for everyone' world?
- ☐ How to calculate incentive point and payable point?
- ☐ What kind of consumption behaviors will generate payable points? What kind of consumption behaviors will generate incentive points?
- ☐ What to do if the carbon account is below 0?

(Credit system-100)_

Trade-off Analysis

ARGUMENTATION ON CRITERIA COMPLIANCE

Decision making capacity

Resources and financing

Feasibility analysis
